

# DIGITAL UNDERWATER PHOTOGRAPHY

## LEARN FROM A PROFESSIONAL PHOTOGRAPHER

April 25th

This course is designed to help you get good results easily, even if you've never used a digital camera before. You'll learn what equipment you'll need to take great underwater photographs, how to prepare your underwater photo system to keep it watertight and basic underwater photo techniques.

- During skill development you'll also learn the basics of digital underwater photography and how to white balance underwater - a method of achieving natural looking photographs without a flash. Further, you'll learn how to assemble, disassemble and clean your underwater photo system.
- After your Open Water session you will learn what makes your photographs even better by expanding what you know about file formats, resolution settings, making your images lighter or darker, getting good color, composing your picture, loading photographs into your computer and adjusting them to look their best.
